## **LETTER OF RECOMMENDATION**

I Am proud to write this letter of recommendation for the candidate who has completed the internship of two months in **Data Science**. It was a pleasure having him in my organisation.

As an intern, **Shivam Bendre** was very focused on his learnings with a high sense of duty. He was always regular with his assignments and self-motivated. He showed keen interest in knowing more about the domain. His curiosity and constant habit of asking questions benefited everyone.

His ability to analyse and interpret complex analytical problems is one of his greatest strengths. He has shown interest and has a good grasp of theory as well as projects. He was able to execute tasks assigned systematically. He was always attentive in class and maintained good conduct during the entire tenure of his internship program. He has a high level of confidence, and is capable of independent thinking, which are the essential traits of a good student.

**Shivam Bendre** maintains a good rapport with mentors and peers. He presents himself in a very gentle manner and is ready to face challenges that come his way. His academic aptitude and intelligence, combined with the management skills that he has demonstrated during his course of study deserves special mention. Having known him for the past two months I can state that he has an indisputable potential for graduate studies. It would give me great pleasure if he's admitted into the graduate program at your esteemed Organisation. I am sure he will be a valuable addition to the program at your Organisation.

Sincerely yours,

**TEACHNOOK**
